

Sew **HOOK** tape on inner side of bag here

Sew **LOOP** tape on inner side of bag here

# Soapnut wash bag pattern

Cut 1 whole piece from fabric of choice

- To make**
1. Cut one whole body piece and 2 pull tabs
  2. Make pull tabs by folding in one long edge to the middle. Then the other long edge to the middle. Fold whole piece in half lengthways and sew in place. **A hot iron helps keep the fold lines in place.**
  3. Repeat so there's 1 pull tab for each side of the bag. Turn over and iron both hem lines of the bag
  4. Take the raw ends of a pull tab, bring together and using the hem lines as a guide position them on the bag where marked, sew securely in place.
  5. Repeat on the opposite side of the bag.
  6. Turn the hem lines back over and sew in place, covering the raw pull tab ends in the process.
  7. Take the hook and loop tape and cut to fit each side of the bag. Sew securely to what will be the inside edge of the bag.
  7. Finish up by folding the whole body piece in half - with pull tabs on the inside & tape on the outside. Sew the body the sides and bottom together and then turn right side out.
  8. Add your soap nuts and secure the bag by pressing the hook & loop tape together. Open again via the pull tabs on each side ☺
